Updates to JM UltraFast® Pre-Assembled Fasteners

With continued personnel and supply chain challenges due to the recent COVID variant surge combined with continued high demand for roofing fasteners and plates, JM is announcing the following changes to the JM fastener and plate offering. These changes make room for additional manufacturing capacity to be directed to higher volume skus.

Effective Immediately:

UltraFast® Pre-Assembled Fasteners and Plates are being suspended. New orders can no longer be accepted, and any existing orders with a delivery confirmation window after March 31st, 2022, cannot be fulfilled. These conditions apply to the following JM SKUs:

At this time, JM is not able to provide a date when these materials will be available again, but notice will be issued when that time period becomes clear. In place of UltraFast Pre-Assembled Fasteners and Plates, please utilize separate UltraFast fastener and plate components for insulation securement.

Additionally, as a result of a supplier-imposed fee, JM is implementing a 35% order cancellation charge for all Non-Stock fastener and plate order cancellations received on or after the date of this announcement. JM continues to stock standard fastener and plate products at our warehouse locations which this cancellation charge will not apply.

Thank you for your continued business and support of JM products. Please contact your JM Representative with any questions.
