## Changes to 45 mil TPO Rolls per Pallet

Johns Manville is altering the pallet configuration on all TPO 45 mil membrane being produced, effective immediately. This change from 9 rolls to 8 rolls per pallet allows greater stability and safety during movement and shipping. It also allows pallets to stack when necessary. Quantities per truckload will change for 6', 8' and 12' product per the below chart.

The change in rolls per pallet should not impact any existing orders on a per roll basis. Any existing inventory of 9 rolls per pallet is being depleted and all remaining orders will be serviced with a pallet quantity of 8 rolls. For a short period of time, orders could use both pallet configurations, again not impacting the requested rolls per order. Please contact your Regional Service Team with any questions.
