

1. How many rolls of tape come in a carton?

16 rolls.

2. Can I break a master carton, for example if i need 3 rolls, can I get only 3 rolls?

No, we will not break cartons. The tape must be purchased in full box quantities of 16 rolls.

3. Does JM offer 96mm wide tape?

No, not at this time.

4. How should I apply the tape?

The best way to apply the tape is with a plastic squeegee. Using a metal edge, like the back of a duct knife or a metal squeegee, may be too abrasive.

5. Can I pull the tape off and reset it on the surface?

Every attempt should be made to not remove or replace the tape once it has been adhered to the facing. If you adhere the tape and then pull the tape off, it may also pull off some of the facing on the Spin-Glas board itself.

6. Do any other tapes provide an exact match to 800 Series Spin-Glas Ultra?

No, this is the only tape that provides an exact match. While other polypropylene coated ASJ tapes are similar, there is a paper layer in their facing composition that creates a visual difference. The facing in the 800 Series Spin-Glas Ultra boards and tape have no paper layer.

7. Can Spin-Glas Ultra tape be used on Micro-Lok HP Ultra pipe insulation?

We do not recommend using Spin-Glas Ultra tape on Micro-Lok HP Ultra pipe insulation. While both Micro-Lok HP Ultra and 800 Series Spin-Glas Ultra have a facing with a polypropylene coating, the facing on 800 Series Spin-Glas Ultra and Spin-Glas Ultra tape is unique in that there is no paper layer. This does create a slight visual difference to Micro-Lok HP Ultra. While 800 Series Spin-Glas Ultra can be installed next to Micro-Lok HP Ultra for a close match, we do not recommend using Spin-Glas Ultra tape on Micro-Lok HP Ultra. Micro-Lok HP Ultra butt strips should be used instead.

8. Does the Spin-Glas Ultra tape meet ASTM E84 25/50 standards?

Yes, the Spin-Glas Ultra tape meets the ASTM E84 25/50 surface burning characteristics of building materials, the same as Spin-Glas Ultra boards.
