## SeamFree<sup>®</sup> Liquid Membrane Product Performance Enhancements

The SeamFree Base formulation has been modified to enhance workability and performance. Slightly longer recoat windows now give installers extra time between coats without sacrificing adhesion; however, cure times (to touch and rainproof) remain the same.

The formulation enhancement also changed the ratio requirements of SeamFree Base to SeamFree Activator. Effective immediately, the quantity of SeamFree Base will now be 3.7 gallons to be mixed with the current 44.1 oz containers of activator.

Advantages include:

- NEW four-gallon mixed kits (Base plus Activator)
- NEW easy to calculate coverage
  - Coat #1 = approximately two squares per four-gallon kit @ 30 wet mils
  - Coat #2 = approximately one square per four-gallon kit @ 60 wet mils
- Greater bond strength between coats
- Improved physical properties

The enhanced product is packaged in four-gallon mixed kits which also simplify estimating.

<b>Packaging</b>	<b>Pallet Quantity</b>	<b>New Material Number</b>
One can 3.7-gallons liquid base	36 pails	70003445

Product Availability: Hazle Township, Pennsylvania and Oklahoma City, Oklahoma

Please note that the existing material number 70000689 for the SeamFree Base will be discontinued when inventory levels are depleted and will no longer be available for purchase. As a reminder, the current SeamFree Activator bottles can be used with either SeamFree Base material numbers.

Thank you for your continued support of Johns Manville.
