Dear Customer:

We have received your request for a Material Safety Data Sheet/Safety Data Sheet (MSDS/SDS) for a Johns Manville product.

Johns Manville has determined that this product fits the OSHA definition of an "article" (see below). Therefore, according to the *Scope and Application* section of the OSHA Hazard Communication standard, 29 CFR 1910.1200 (b)(6)(v), this product is not subject to the standard and therefore an MSDS/SDS is not required. Johns Manville has authored a safe use instruction for additional product information.

"Article" means a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this section), and does not pose a physical hazard or health risk to employees. (29 CFR 1910.1200(c))

If you have further questions, please contact our Product Safety Department at productstewardship@jm.com.
