

JMs full line of mineral wool insulation now offers more options and densities for exterior applications.

Johns Manville's CladStone™ Water & Fire Block Insulation is ideal for exterior cavity wall and rainscreen applications. This mineral wool insulation board is noncombustible and comes in four different densities: 45 (4.5 pcf), 60 (6.0 pcf), 80 (8.0 pcf), and 110 (11.0 pcf). The array of densities allows installers to select the density that best suits the unique needs of their application or installation.

CladStone™ is water-resistant and can contribute to the fire safety of the structure, which makes it an ideal solution for a variety of rainscreen and continuous insulation applications. CladStone™ is part of our full line of mineral wool products, please reference the chart below to find the right JM product for you.
