

**JM SAFB MINERAL WOOL INSULATION  
REFORMULATED WITH**

# THE ELEMENTS OF **BLUE**

We heard what you said, so we've made some changes. Our JM SAFB Mineral Wool Insulation has been reformulated with the elements of performance, efficiency and service to help you get the job done right.

## **ROBUST DESIGN + REFINED PACKAGING**

- With improved integrity and rigidity, it won't slouch once installed.
- Bounces back to its full thickness once removed from packaging.
- More durable packaging helps the product arrive intact.

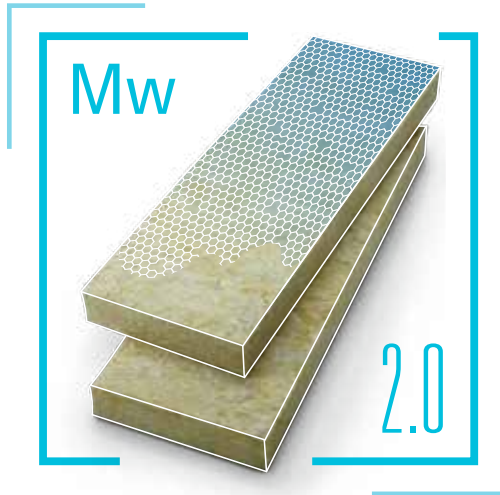

## **ON-THE-JOB EFFICIENCY**

- More product per bag means more product per truckload – resulting in freight and storage savings.
- Get a combination of JM insulation products in one mixed truckload.
- Product is easy to handle and can be cut with a standard insulation knife.

## **MULTIFACETED PERFORMANCE**

- Naturally moisture- and corrosion-resistant.
- Provides natural sound-dampening capabilities – improving wall assembly STC ratings by up to 10 dB.
- Can withstand temperatures of 2,000° F (1,093° C) without melting.

The JM experience is about innovation, and our reformulated SAFB Mineral Wool Insulation is the latest improvement in our full line of mineral wool products. Our line also includes our JM CladStone™ Water & Fire Block, Safing, Curtainwall, TempControl® and Sound & Fire Block® insulation.

## **TECHNICAL SUPPORT**

- Contact one of our JM TechConnect<sup>SM</sup> experts at 1-800-654-3103 for information about equivalent products, physical product properties, LEED compliance, or any other technical performance details.
- Call your Territory Sales Manager for information regarding specification or substitution requests.

**PUT US TO THE TEST.**
