Updated Single Ply FM Global and UL Code Summaries

Johns Manville is proud to distribute improved single ply code summaries. These updated summaries represent the most commonly used systems and feature:

- Upgraded approval ratings for existing systems
- Productivity enhancing approvals
- New product offerings

JM EPDM

- Mechanically Fastened FM Approvals
- Adhered Membrane – Fastened Insulation FM Approvals
- Adhered Membrane – Adhered Insulation FM Approvals

JM TPO

- Mechanically Fastened and Induction Welded FM Approvals
- Adhered Membrane – Fastened Insulation FM Approvals
- Adhered Membrane – Adhered Insulation FM Approvals

JM PVC

- JM PVC & JM PVC SD Plus Mechanically Fastened and Induction Welded FM Approvals
- JM PVC Adhered Membrane – Fastened Insulation FM Approvals
- JM PVC Adhered Membrane – Adhered Insulation FM Approvals

Code summaries are located on the Web at www.jm.com/roofing in the Systems Considerations section within the membrane system you desire- TPO, PVC or EPDM.

COMMERCIAL ROOFING

TPO ROOFING SYSTEMS

Manufactured in our facility in Scottsboro, Alabama, a Johns Manville TPO roofing system gives you the option of a reliable, cost-effective roofing system. Our current membranes are reinforced with a polyester fabric and manufactured using an ultraviolet-resistant thermoplastic polyolefin formulation. TPO roofing comes in several thicknesses and has been designed for ease in installation. And for your convenience, systems can be installed fully adhered or mechanically fastened. We also offer a complete line of accessories, sealants and adhesives to help ensure a waterproof installation.

100% TPO roofing materials are formulated using the best available technology.
