## APP Product Line Enhances UL<sup>®</sup> Codes Position

We are pleased to announce that APPeX<sup>®</sup> 4.5M and DIBITEN Poly 4.5 can now be used in UL Class A and Class B approval systems that previously required APPeX<sup>®</sup> 4.5M FR & DIBITEN Poly 4.5 FR. APPeX 4.5M & DIBITEN Poly 4.5 (non-FR) can be used in systems up to Class A ½":12" slope for non-insulated systems and up to ¼":12" slope for insulated systems. Our Cool Roof Granulated (CR G) products, APPeX<sup>®</sup> 4.5M CR G and DIBITEN Poly 4.5 CR G (non-FR) can be used in systems up to Class A ¼":12" slope. The summary of updated UL listings can be found [here](#). To view our official UL approvals click [here](#).

Please contact your local sales rep for any specific project related questions and specific product requirements.
