## Johns Manville Announces SeparatoR® FR

SeparatoR FR is the new solution for your UL® Class A Wood Deck applications for mechanically attached and induction welded single ply membranes. This board is a ½" thick polyisocyanurate foam core board with premium inorganic coated-glass facers that yield UL Class A approvals for mechanically fastened single ply systems over a combustible wood deck or recover application.

### Class A Approvals over Combustible Wood Deck Include:

UL Class A Approval with Mechanically Fastened TPO			
Deck	Incline	Insulation*	Membrane
C-15/32	3/4	SeparatoR FR	JM TPO
C-15/32	1/2	SeparatoR FR	JM TPO FB

UL Class A Approval with Mechanically Fastened PVC			
Deck	Incline	Insulation*	Membrane
C-15/32	2	SeparatoR FR	JM PVC
C-15/32	2	SeparatoR FR	JM PVC SD Plus

UL Class A Approval with Mechanically Fastened EPDM			
Deck	Incline	Insulation*	Membrane
C-15/32	1/2	SeparatoR FR	JM EPDM R

\*all joints staggered min of 6 in. from the plywood joints

### Product Overview:

SKU	Product	Thickness	Size	Boards per Pallet	Pallets per Truck
90026679	SeparatoR™ FR	½"	48" x 48"	50	72
90026680	SeparatoR™ FR	½"	48" x 96"	50	36

SeparatoR FR is manufactured in Fernley, NV and Hazleton, PA. It is stocked in Tracy, CA and Fernley, NV.

### Installation and Specification:

Installation of SeparatoR FR follows the same guidelines as polyisocyanurate insulations, with joints butted tightly together. For wood deck application the board joints shall be offset a min. of 6" from joints in the plywood or OSB substrate. Boards are preliminarily fastened using a minimum of 5 fasteners and plates per 4x8 board or 4 per 4x4 board. SeparatoR FR is compatible with standard induction plate fastening patterns. SeparatoR FR is eligible to be included in the JM Peak Advantage® Guarantee.

Contact your local sales representative to find out more about the system benefits with SeparatoR FR.
