JM Expands EPDM FIT Offering to Include One-Sided Pre-Taped

Johns Manville launched EPDM FIT (Factory Inseam Tape) with two-sided Pre-Taped product in March 2015 with their patented tape-to-tape solution. This product has seen significant growth over the past 3+ years. Due to this success JM has decided to expand their offering to include a one-sided pre-taped solution available January 14th, 2019. JM's one-sided pre-taped product will be offered with 4" or 6" FIT. This expansion will also include the addition of 20' & 30' one-sided pre-taped. Johns Manville EPDM R FIT for mechanically fastened systems will continue to be only offered with a tape-to-tape (2-Sided) configuration.

JM will continue to produce their patented two-sided tape solution as a made-to-order product and they will offer one-sided tape as a stocked item. A complete list of stocked and made-to-order products will be distributed in your January 1st, 2019 price pages.

The new one-sided pre-taped product will be available for shipment on January 14th, 2019. Please contact your sales rep or account manager with any questions.

Thank you for your continued support.

John Quante
EPDM Product Manager
