Johns Manville Announces New Submittal Wizard

The new Submittal Wizard feature is live on jm.com/roofing! Previously the Submittal Wizard was driven based on application method. Now, you can simply filter to a system and go from there! For example, when you filter to EPDM membranes, only the products compatible with an EPDM system will show in the following product folders. You can use the Selection preview to see the current products you have selected. Want to make sure you have the right product for the right system? Quickly check out the data sheet of any product by clicking on the  button next to the product names.

Don't forget to hit *SUBMIT REQUEST* to get your submittal package in your email!

JM Peak Advantage® contractors are familiar with this functionality as it mirrors the functionality of the Submittal Wizard in the JMConnexus guarantee portal. This update addresses previous issues of multiple single ply membrane thicknesses coming through in submittal packages as well as multiple data sheet and SUI documents.

We are very excited for this upgrade and the new functionality! If you have any questions or concerns, feel free to reach out directly to me at brandi.burgei@jm.com.
