Johns Manville Expands 12-ft PVC Offering

Johns Manville is excited to announce the expansion of our 12-foot-wide PVC offering, now including both JM PVC with Elvaloy™ KEE and JM PVC SD Plus, in 60 and 80 mil thicknesses. JM is the only roofing manufacturer to offer 12-ft wide PVC. The benefits of using 12-ft membrane are widely understood across the industry and include reducing the number of seams by 20%, lifts to the roof, and waste.

JM's 12-ft wide PVC Line

Membrane	Thickness	Width
JM PVC with Elvaloy™ KEE	60 mil	12-ft
JM PVC with Elvaloy™ KEE	80 mil	12-ft
JM PVC SD Plus 60	60 mil	12-ft
JM PVC SD Plus 80	80 mil	12-ft

All the membranes are approved for adhered and induction welded applications. Reduce your risk, reduce labor and increase profits with JM 12-ft wide PVC.

For additional information on minimum requirements and lead-times, contact your local JM sales representative or customer service advocate.
