JM QuickFoam™ – Available Now!

Johns Manville is excited to announce the launch of our new low-rise foam adhesive, JM QuickFoam™!

Approved in beads or spatter for insulation boards, cover boards, and fleece-back membranes, QuickFoam™ offers the benefits of **SPEED + PERFORMANCE**.

RETRACTION – QuickFoam™ retracts as it cures which eliminates post-rise, reduces telegraphing, and improves green strength*.

FLEXIBILITY - QuickFoam™ offers exceptional bonding strength while remaining flexible once cured.

VERSATILITY – QuickFoam™ adhesive is engineered for broad compatibility, working effectively with all major spray rigs**.

Please reference our JM QuickFoam™ [Data Sheet](#), [Sell Sheet](#), and [Installation Guidelines](#) for more information.

*Green strength can be defined as the bond strength of an adhesive before it has fully cured and reached its final ultimate tensile strength. This strength is usually considerably lower than the final ultimate bond strength.

**When switching products, JM recommends following equipment manufacturer's instructions for purging existing material prior to switching to a different product.

PRODUCT ANNOUNCEMENT

Roofing Systems

717 17th St. Denver, CO 80202 (800) 922-5922
