Features and Components

Use: Asphalt bleed-out coverage or aesthetic touch ups on modified bitumen and built-up cool roof coated cap sheets.

Type: One-part, acrylic elastomeric seam coating.

Color: White

Features: Asphalt bleed blocking.
- Improved aesthetic appearance.
- Energy savings.
- Prolonged roof life.
- Reduced life cycle costs.

System Compatibility

This product may be used as a component in the following systems. Please reference product application for specific installation methods and information.

<table>
<thead>
<tr>
<th>Multi-Ply</th>
<th>BUR</th>
<th>APP</th>
<th>SBS</th>
</tr>
</thead>
<tbody>
<tr>
<td>HA</td>
<td>CA</td>
<td>CA</td>
<td>HW</td>
</tr>
</tbody>
</table>

Compatible with all Multi-Ply systems

Key: HA = Hot Applied CA = Cold Applied HW = Heat Weldable SA = Self Adhered MF = Mechanically Fastened FA = Fully Adhered BA = Ballasted

Energy and the Environment

CRRC®
- Initial Reflectivity: 0.76 Emissivity: 0.85
- Weathered Reflectivity: 0.61 Emissivity: 0.92

Rated Product ID: 0662-0007 Licensed Manufacturer ID: 0662
Classification: Production Line

LEED®
- SRI: 92
- Recycled Content: 0%
- VOC: 17 g/L (max.)

Energy Star

Installation/Application

- Apply when temperature is 50°F (10°C) and rising. Do Not Thin.
- Please refer to detailed installation instructions on next page.

Packaging and Coverage

* Coverage, open and dry time rates can vary dramatically depending on the particular substrate and environmental conditions. Coverage rates stated herein are approximate only.

If FM Global® or UL® approval is required, consult specific RoofNav® or the UL Certifications Directory for specific application rates.

Storage

| Shelf Life | 12 months from manufacture date (unopened pail) |
| Storage Conditions | Clean, dry, indoor environment in an unopened or tightly sealed container. |
| Temperature Range | 40°F – 100°F (4°C – 38°C) - Protect from freezing |

* Cool Roof Rating Council ratings are determined for a fixed set of conditions, and may not be appropriate for determining seasonal energy performance. The actual effect of solar reflectance and thermal emittance on building construction may vary.

Manufacturer of product stipulates that these ratings were determined in accordance with the applicable Cool Roof Rating normal procedures.

Refer to the Safety Data Sheet and product label prior to using this product. The Safety Data Sheet is available by calling (800) 922-5922 or on the Web at www.jm.com/roofing.
Installation/Application Instructions

For best results, apply this product on roofing membranes that have cured for 60 days or longer.

Use a brush, roller or spray equipment to apply JM CR Seam Coating. All surfaces must be clean, dry and free of any dirt, grease, oil or other debris that may interfere with proper adhesion. If multiple applications are needed, the first coat should be completely dry (normally 4 to 12 hours) before applying the subsequent coats.

Temperatures must be 50°F (10°C) and rising during time of application. Do not apply JM CR Seam Coating within 24 hours of anticipated rain, dew or freezing temperatures. As with any coating, cooler temperatures and high humidity will slow the cure time. Coating should be applied under normal environmental conditions without thinning. All equipment can be cleaned with water and heavy duty detergent.

Precautions

Avoid prolonged contact with skin • Avoid contact with eyes • Do not take internally • Keep container closed when not in use • Keep out of reach of children.

Refer to the Safety Data Sheet and product label prior to using this product. The Safety Data Sheet is available by calling (800) 922-5922 or on the Web at www.jm.com/roofing.
