Features and Components

Use: For use with JM BUR and SBS membrane products. It is part of the JM PermaFlash® Bituminous Flashing System for penetrations and other details. Ideal for areas where hot asphalt is prohibited, not desirable or not practical.

Type: Two-part, elastomeric, liquid-applied flashing material.

Color: Black

Features: Cures to a durable, elastomeric film and forms exceptional bonds between the modified bitumen and underlying substrate. Resists virtually all factors affecting base flashing performance while providing superior flexibility and durability. UV stable, high solids, low odor, VOC compliant.

System Compatibility

This product may be used as a component in the following systems. Please reference product application for specific installation methods and information.

<table>

Used to adhere Flashings in all Multi-Ply systems

Key: HA = Hot Applied CA = Cold Applied HW = Heat Weldable SA = Self Adhered MF = Mechanically Fastened FA = Fully Adhered BA = Ballasted

* When used as part of the PermaFlash Flashing System.

Energy and the Environment

Maximum VOC

- <121 g/l (base)
- 0 g/l (activator)
- <58 g/l (activated base)

Installation/Application

- Apply between 40° and 100° F (4° and 38° C)
- Service temperature is -60° to 220° F (-51° to 104° C)
- Please refer to detailed installation instructions on next page

Packaging and Coverage

<table>
<thead>
<tr>

<td>Base &amp; Activator: 28.7 oz (848.8 ml) cartridges</td>
<td>Coverage Rate*: 20-25 ft/gal (0.49 - 0.61 m²/l)</td>
<td></td>
</tr>
</tbody>
</table>

* Nominal 1/16" (2 mm) thick layer of adhesive. Coverage, open and dry time rates can vary dramatically depending on the particular substrate and environmental conditions. Coverage rates stated herein are approximate only. If FM Global® or UL® approval is required, consult specific RoofNavSM or the UL Certifications Directory for specific application rates.

Storage

- Shelf Life: Base: 24 months from manufacture date
- Activator: 2 yrs; Cartridges: 1 yr

- Storage Conditions: Clean, dry, indoor environment in an unopened container
- Temperature Range: 60°F – 90°F (16°C – 32°C) - Protect from freezing

Refer to the Safety Data Sheet and product label prior to using this product. The Safety Data Sheet is available by calling (800) 922-5922 or on the Web at www.jm.com/roofing.
Surface Preparation
When flashing to sheet metal, PermaFlash Primer is required and should be applied as prescribed on the primer label.

MBR Flashing Cement bonds very well to clean, dry, well-cured concrete. However, concrete cured with mineral oils, resins or waxes requires the use of JM Concrete Primer. In addition, clean and coat concrete soiled with oil, grease or release agents with JM Concrete Primer, following the instructions on the pail.

Mixing Instructions
These instructions apply to MBR Flashing Cement in 3.9 gal (14.8 l) pails.
(1) pail MBR Flashing Cement Base Contents: 3.9 gal (14.8 l)
(1) jug MBR Flashing Cement Activator Contents: 44.1 oz (1.3 l)
All two-part products are color-coded products.

Installation/Application Instructions
Apply between 40° and 100° F (4° and 38° C)
On the substrate to be flashed, use a trowel to spread the mixed material to obtain a full coverage coating, without voids, to a minimum thickness of 1/8” (3.2 mm). As the coating process proceeds, lay the flashing membrane into the bed of cement. Check all flashing details to determine if there is a nailing requirement.
Seal side laps in the same manner, at a minimum of 4’ (10.2 cm).
For penetrations, use MBR Flashing Cement in conjunction with PermaFlash® Primer and PermaFlash® Scrim.

Clean-Up and Disposal
Clean-Up Information
Use mineral spirits to clean tools immediately after completion of work. Periodically place tools in a pail of mineral spirits to prevent buildup of cement. Wear rubber gloves during all applications and clean up procedures. Follow manufacturer’s warnings and cautions about using solvents.

Disposal Information
Please dispose in accordance with applicable regulations.

Empty Containers
MBR Flashing Cement Base containers, when empty, contain combustible and harmful vapors and residue. Do not reuse the container or remove the labels. Follow all of the label warnings even when the container is empty. Dispose of containers in accordance with applicable regulations.

Precautions
MBR Flashing Cement is prepared on the jobsite and requires extra care during preparation. Roofing contractors must advise their crews to precisely follow all safety, storage, handling, preparation and application instructions. JM will not accept responsibility for any use of this product that does not comply with the instructions printed on the containers.

Refer to the Safety Data Sheet and product label prior to using this product. The Safety Data Sheet is available by calling (800) 922-5922 or on the Web at www.jm.com/roofing.
