Polymere Auger Fasteners and Plates

Solid Glass-Reinforced Nylon Fasteners

Installation/Application
Polymere Auger Fasteners can be installed into some cementitious wood fiber decks without pre-drilling. A pilot hole is required for gypsum. Use pull-out tests to determine required pilot hole size, typically 7/16", 1/2" or 9/16". Pilot holes must be a minimum of 1/2-in. deeper than embedment. Install fasteners using a heavy duty variable speed screw gun. Installation at a low rpm is recommended. Minimum fastener embedment into the deck should be 1 1/2 in. (2 in. recommended). The Polymere Auger fastener should never penetrate the underside of the deck.

System Compatibility
This product may be used as a component in the following systems. Please reference product application for specific installation methods and information.

Multi-Ply
