

### Features and Components

The UltraFast® Plus Plate is made of Galvalume®\*-coated steel. The 3" (7.62 cm) nominal square plate is 0.010" (0.25 mm) thicker than the standard UltraFast square metal plate, providing a stiffer surface area to improve wind uplift performance of the system. The plate is used for fastening Invinsa® Roof Board to the roof deck in fully adhered single ply systems. The plate is designed to be used with UltraFast #12 or #14 fasteners.
