DIAMONDBACK® PRE-CUT CRICKETS
Polyisocyanurate Sloped Insulation Panels

Meets the requirements of ASTM C 1289, Type II, Class 1,
Grade 2 (20 psi)
• DiamondBack Pre-Cut Crickets
Grade 3 (25 psi)
• DiamondBack 25 PSI Pre-Cut Crickets

Features and Components

Glass-Reinforced Facers: Provide rigidity and protection to the foam core and are compatible with BUR, modified bitumen and single ply membrane systems.

Closed Cell Polyisocyanurate Foam Core: Utilizes an environmentally compliant blowing agent that provides high thermal insulation performance.

Precise Factory Cuts: Custom designed to provide reduced job-site waste disposal, increased labor efficiency and smooth field transitions.

System Compatibility

This product may be used as a component in the following systems. Please reference product application for specific installation methods and information.

<table>
<thead>
<tr>
<th>Multi-Ply</th>
<th>BUR</th>
<th>APP</th>
<th>SBS</th>
</tr>
</thead>
<tbody>
<tr>
<td>HA</td>
<td>CA</td>
<td>CA</td>
<td>HV</td>
</tr>
<tr>
<td>HA</td>
<td>CA</td>
<td>HV</td>
<td>SA</td>
</tr>
</tbody>
</table>

Compatible with the selected Multi-Ply systems above

Key:
HA = Hot Applied
CA = Cold Applied
HV = Heat Weldable
SA = Self Adhered
MF = Mechanically Fastened
FA = Fully Adhered
BA = Ballasted

Energy and the Environment

LEED® Recycled Content
Varies with thickness, see Thermal Performance chart on back page.

Complies with EPA, CEPA and Montreal Protocol requirements

Peak Advantage® Guarantee Information

Systems
For use in approved JM Peak Advantage Roofing Guarantees

Installation/Application

• May be installed over metal, nailable and non-nailable roof decks in built-up, modified bitumen and single ply membrane roofing systems.

• With computerized accuracy, DiamondBack Pre-Cut Crickets are designed, cut and packaged with the required number of cricket pieces and delivered to the job ready for installation. The customized bundle and individual panel labeling allows for easy onsite identification.

• Refer to the application instructions guidelines for proper utilization of this product.

Packaging and Dimensions

Codes and Approvals

• FM® Standards 4450/4470 Approvals (refer to FM RoofNav®)
• UL® Standard 790, 263 and 1256 (refer to UL Roofing Materials system directory)
• Meets the requirements of CAN/ULC S704, Type 2, Class 3
• California Code of Regulations, Title 24, Insulation Quality Standard License #TI-1341
• Third-party certification with the PIMA Quality Mark™ for Long-Term Thermal Resistance (LTTR) values
• Meets Clean Air Act Amendments of 1990

Refer to the Safe for Use instructions and product label prior to using this product. The Safe for Use instructions are available by calling (800) 922-5922 or on the Web at www.jm.com/roofing.

Note: Technical information on this data sheet is intended to be used as a general guideline only and is subject to change without notice. Contact your JM Sales Representative for further details.
