Features and Components

Use: JM SP Liquid Flashing TPO and PVC Primer is used to prime the JM TPO and PVC (KEE and SD Plus) single ply membranes as part of the JM SP Liquid Flashing system.

Type: Single component, solvent based membrane primer

Color: Light yellow

Features: Excellent adhesion to JM TPO and JM PVC single ply membranes

- Quick curing to speed up application time
- Single component for easy 1-step application
- No mixing needed, just pour and spread

Installation/Application

- Surface must be prepped and cleaned with appropriate solvent cleaner.
- Apply immediately and work quickly. Product will begin to flash off within 5 minutes.
- Apply when temperature is 41°F - 90 °F (5 °C - 32 °C).
- Ensure rising temps between 41 °F - 50 °F (5 °C - 10 °C).
- Substrate must be at least 5 °F (3 °C) above dew point.
- A JM SP Liquid Flashing Resin should be applied as soon as the primer has been cured, or tack free within 1-2 hours.
- Refer to the JM SP Liquid Flashing Application Guide for full installation and application instructions, including substrate preparation, primer selection, scrim install, and final resin application.

System Compatibility

This product may be used as a component in the following systems. Please reference product application for specific installation methods and information.

</table>

*Coverage rate will vary dramatically depending on the particular substrate and environmental conditions. Increased consumption will occur at higher temperatures. Coverage rates stated hereinnare approximate only.

Work Time*

- Application Window: 5 minutes
- Water Resistant: Approximately 30 minutes
- Additional Coatings: Approximately 30 minutes Maximum exposure window = 24 hours
- Physical Characteristics: Light yellow liquid cures to solid

*Values determined at 73 °F (22.8 °C), 50% relative humidity. Actual application will vary based on actual ambient temperature, air flow, and humidity.

Refer to the Safety Data Sheet and product label prior to using this product. The Safety Data Sheet is available by calling (800) 922-5922 or on the Web at www.jm.com/roofing.

Installation/Application

- Surface must be prepped and cleaned with appropriate solvent cleaner.
- Apply immediately and work quickly. Product will begin to flash off within 5 minutes.
- Apply when temperature is 41°F - 90 °F (5 °C - 32 °C).
- Ensure rising temps between 41 °F - 50 °F (5 °C - 10 °C).
- Substrate must be at least 5 °F (3 °C) above dew point.
- A JM SP Liquid Flashing Resin should be applied as soon as the primer has been cured, or tack free within 1-2 hours.
- Refer to the JM SP Liquid Flashing Application Guide for full installation and application instructions, including substrate preparation, primer selection, scrim install, and final resin application.

Storage

- Shelf Life: 12 months from manufacture date.
- Storage Conditions: Clean, dry, indoor environment out of direct sunlight. Store in unopened or tightly sealed container.
- Temperature Range: 40 °F - 80 °F (5 °C - 27 °C) Protect from freezing.
- Best Practices: Allow product to acclimate at 65 °F - 70 °F (18 °C - 21 °C) for 24 hours prior to use.

JM SP Liquid Flashing TPO and PVC Primer is considered a hazardous material in the uncured, liquid form. See the product SDS for appropriate storage and handling requirements.
Clean-Up and Disposal

Clean-Up Information
When work is interrupted or completed, tools must be thoroughly wiped clean before the primer flashes off. Work quickly as you have five minutes until product begins to harden. Acetone can be used to assist in cleaning.

Disposal Information
For disposal instructions, please refer to the safety data sheet.

Precautions

JM SP Liquid Flashing TPO and PVC Primer is a combustible material and should be shipped and stored away from open flames, heat or sources of ignition. Keep all pails tightly sealed while in storage. It should be used only in well-ventilated areas. It may cause eye, skin and respiratory irritation, and is harmful or fatal if swallowed. Avoid contact with skin. Use impervious clothing and rubber gloves to avoid prolonged or repeated contact with skin. Read the container label and follow all safety instructions.

Handling
Refer to product Safety Data Sheet (SDS) for additional information pertaining to this product and prior to use or handling. Roofing contractors must advise their crews to precisely follow all safety, storage, handling, preparation and application instructions. JM will not accept responsibility for any use of this product that does not comply with the instructions printed on the containers.
