SBS

styrene-butadiene-styrene modified bitumen With over three decades of experience producing modified bitumen, we understand the science of formulating systems that last. Our SBS is a premium modified bitumen engineered specifically for elasticity and high performance. It is made to withstand even the harshest environments. Multi-ply SBS systems are the most customizable of our low slope commercial roofing offerings, with glass, polyester and composite reinforcements. It can be installed with the widest variety of application methods, including cold applied, heat weld, self-adhered, mechanically fastened and hot applied applications.
