

SPECIALTY ROOFING PRODUCTS

At Johns Manville, we provide our customers with the most complete set of products found in the commercial roofing industry. We offer a full line of specialty products to support SBS and APP modified bitumen and EPDM, PVC and TPO single ply membrane systems. This selection includes expansion joint covers, edge metal systems, retrofit drains and tie-in flashing systems. Architectural drawings, along with CSI format short- and long-form specifications and details, are also available.

We help our customers be successful by providing access to specialty roofing products and resources to complete the full JM roofing system. By using a single-source roofing systems provider, our customers have the reassurance that they can receive a total roofing systems guarantee.

EXPAND-O-FLASH®

Effective, flexible, weatherproof exterior closures designed to accommodate movement between horizontal building components caused by thermal changes, settlement, wind and seismic forces.

EXPAND-O-GARD® EXPANSION JOINTS

Flexible waterproof closures for vertical building elements that are designed to accommodate movement between building components caused by thermal changes, settlement, wind and seismic forces.

COPING AND FASCIA SYSTEMS

Available in a variety of dimensions and with factory-fabricated accessories to fit your field conditions. These systems are designed for maximum protection against wind uplift and water intrusion, with options compatible with single ply and bituminous systems.

RETROFIT ROOF DRAINS

Provide drainage control and watertight seals between the roof, the drain and plumbing.
