JM PVC WITH DUPONT™ ELVALOY® KEE

ADVANTAGES:

**FORMULATION**
The JM PVC formulation uses DuPont™ Elvaloy® KEE, a solid plasticizer that bonds with the PVC to provide consistent plasticizer retention. This maintains high flexibility and durability throughout the life of the roofing system.

**SUPERIOR CHEMICAL RESISTANCE**
Manufacturing, airports, restaurants and food processors are perfect examples of ideal PVC installations because of the inherent chemical resistance provided by the membrane’s chemistry.

**PROVEN PERFORMANCE**
The JM PVC formulation has been produced by the same manufacturer for over 25 years. JM’s product engineers are dedicated to ensuring quality control, continued testing and the development of innovative and enhanced products.

**FIRE-RESISTANT PROPERTIES**
PVC is widely used in construction based on its inherent reduced fire spread.

WHY SPECIFY JM PVC?
Excellent code approvals, lower maintenance costs, labor savings and roof re-covers that extend the life of existing systems. All this from a company that invests in specialized education and training for roofing professionals, together with a top-notch certified contractor program.
