

Combining roofing expertise with skylight expertise for the total roof solution

Design Assistance

JM Specifier Services and Logistics Lighting can help you design a total roof solution to meet the needs of the project and installation conditions. Our consultative services include energy efficiency calculations and analysis of the thermal impact of skylights on the building's energy load of the building.

Technical Service

The technical service from JM and Logistics Lighting includes streamlined project management, delivery coordination, on-the-roof support, and installation expertise for your roof project.

Comprehensive Guarantees

As one of the largest distributors of skylights in the US, Logistics Lighting can source from multiple national vendors to provide the best skylight solution to include in your JM Peak Advantage Guarantee.
