Product description:

StarStran® chopped strands with 739 sizing are produced by chopping E-glass fibers coated with a silane based sizing.

StarStran® 739 has been specifically designed as a highly effective reinforcement for Polyolefins, such as Polypropylene compounding in D-LFT (Direct Long Fiber Thermoplastics).

StarStran® 739 can be used as reinforcement of glass filled long fiber parts for transport packaging and recreational vehicle parts, such as water craft structural parts.

Resin compatibility:

- Polypropylene (PP)

Benefits:

- Excellent matrix bonding in polypropylene
- Outstanding strand integrity
- Effective fiber dispersion
- Optimal fiber distribution

Designation: Glass type is E-Glass

Warranty disclaimer:
The physical (or chemical) properties of Johns Manville products represent typical average values obtained in accordance with accepted test methods at the time of manufacture and are subject to normal manufacturing variations. They are supplied as a technical service and are subject to change without notice. Check the Johns Manville office to assure current information. For a copy of the Johns Manville Limited Warranty and Limitation of Remedy or other product information, contact your local Sales Representative.

Storage:
These products should be stored in original packaging in dry, roofed, dust free storehouses. The recommended temperature is between 10°C to 30°C (50°F to 86°F) at relative air humidity between 50% to 75%. The products should remain in the original packaging and be conditioned in the work area for a minimum of 24 hours prior to use. The pallets should be single stacked unless otherwise specified on the packaging unit.

Values:
All data represent typical average values.
