

# YEARS OF JM HVAC INNOVATION

**Spiral SG**  
May 2014

Light-weight fiberglass blanket designed specifically to insulate double-wall spiral ducts.

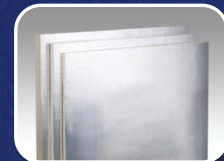

**Microlite® White PSK**  
October 2015

A lightweight, Formaldehyde-free™ fiberglass duct wrap with a white, poly-scrim-kraft (PSK) facing. The PSK offers an extremely clean appearance that appeals to aesthetics by matching adjacent ceilings, walls, or pipe coverings.

**SuperSeal® Reformulation**  
October 2017

SuperSeal HV (high-viscosity) and SuperSeal Edge Treatment underwent an innovative reformulation to help improve the usability, functionality, and availability of the product.

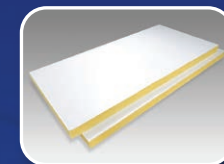

**XSPECT® ISOfoam APF Board**  
November 2017

XSPECT is a versatile insulation that is ideal for a variety of hot and cold mechanical and OEM applications, including rooftop ducts and HVAC equipment. This polyisocyanurate foam board offers one of the highest R-values per inch of any rigid insulation available.

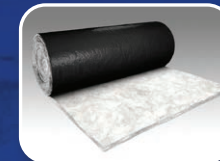

**Improved Spiracoustic Plus® Pallet Packaging**  
March 2019

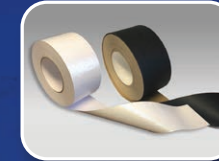

**800 Series Spin-Glas® Ultra**  
April 2019

JM's first fiberglass board with a poly-top facing. This paper-free facing is cleanable and moisture-resistant with a polypropylene coating that is designed to be similar in appearance to Micro-Lok® HP Ultra so that the two insulations can be installed side-by-side.

**Microlite® Black PSK**  
June 2019

This Formaldehyde-free™ fiberglass duct wrap is adhered to a black-coated poly-scrim-kraft (PSK) facing designed specifically to offer a sleek, sophisticated look to insulate with aesthetics in mind.

**Microlite® Black & White PSK Tape**  
June 2019

Seaming tape designed to provide a vapor-barrier seal on JM's PSK-faced Microlite duct insulations. The tape is 96 MM wide and is offered in white or black to match our PSK-faced Microlite duct insulations.

**Microlite® R-19 Flexible Duct Wrap**  
January 2021

The new Washington State Energy code requirements, calling for specific ducts to be insulated to the same R-value as the walls within the structure. With R-19 duct wrap, contractors now have a single-layer solution designed specifically to insulate ducts.

2019

2020

2021

**Linacoustic® RC R-12 Duct Liner**

June 2018

JM introduced first-ever flexible, R-12, fiberglass duct liner, specifically designed to meet the latest IECC code requirements calling for R-12 liner. It is the only flexible fiberglass duct liner on the market that can meet the new R-12 code requirements in a single layer.

**Duct Insulation Knives**

June 2018

The 6" knife comes with a curved handle designed to fit the hand, and the blade is engineered to smoothly cut through fiberglass insulation and facing without snagging the material.

**SMACNA Premier Partner**

July 2018

JM became the 6th SMACNA Premier Partner, supporting sheet metal contractors throughout North America.

**Automated Packaging System**

October 2018

By implementing an automated packaging machine in our Cleburne, TX facility, we were able to improve our product packaging substantially in both appearance and functionality, while also reducing injury risk for our plant personnel.

**Microlite® R-12 Flexible Duct Wrap**

November 2018

The first ever, 4.4" Formaldehyde-free™ fiberglass duct wrap, designed to meet the IECC's new R-12 duct insulation requirements. This is the only single-layer R-12 duct wrap available on the market today.

**Improved Duct Wrap Packaging**

December 2018

Improved packaging of duct wrap poly packaging at our Willows facility.

**E<sup>3</sup> Pallet™ Technology**

September 2020

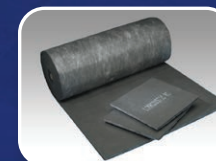

JM has reinvented large pallet design with our new, patent-pending E<sup>3</sup> Pallet™ Technology. The technology was designed to make it cheaper and easier to recycle and reuse the 4x8 and 4x10 pallets that we use to ship our HVAC board products.

**GREENGUARD® Gold Certified Duct Liner**

October 2020

JM's market-leading duct liners, Linacoustic® RC and Linacoustic® RC-HP, are now GREENGUARD Gold Certified at all available thicknesses, making them ideal for applications in schools, hospitals, and offices.

**Spiracoustic Plus® VVSD**

October 2020

The first, pre-kerfed, single-wall, duct insulation, engineered specifically for VVSD (very very small diameter) spiral ducts with an outer diameter of 6 to 8 inches.
