MINWOOL-1200® MITERED FITTINGS

MinWool-1200 Mitered Fittings are made of inorganic fibers derived from basalt, a volcanic rock, with thermosetting resin binder. Advanced manufacturing technology ensures consistent product quality, with high fiber density and low shot content, for excellent performance in thermal control and fire resistance applications. These mitered and bonded fittings are for standard short and long radius and non-standard radius sweep elbows found in normal piping schemes. Fittings are manufactured from MinWool-1200 water-repellent Preformed Pipe Insulation and mitered into precision segments. The segments are adhered with adhesive, for ease of installation following the MICA National Commercial and Industrial Insulation Standards.

ADVANTAGES

Water-Repellent. MinWool-1200 Mitered Fittings perform in accordance with BS EN 13472-2012, adsorbing less than <0.35 kg/m² of water during water absorption tests at temperatures up to 425°F (218°C).

Thermal Performance. Good thermal conductivity values help maximize control of heat loss, contributing to reduced operating costs and greater energy savings.

Light Weight, Low Dust, Protected Outer Surface. Easy to handle and fabricate, Lamella Tank Wrap insulation is easy to cut with a knife. Clean handling properties and factory applied facers help reduce skin irritation and minimize job cleanup time and expense.

Mold Resistant. MinWool-1200 Mitered Fittings do not support the growth of fungi.

APPLICATIONS

Mitered fittings are produced to fit NPS pipe sizes and copper tubing sizes for commercial and industrial applications at temperatures ranging from ambient to 1200°F (650°C). Very low in-service shrinkage helps prevent gaps from forming at joints, preventing costly thermal leaks. The insulation is designed to be factory or field jacketed. It may be installed directly on hot surfaces; system shutdown and staged heat-up are not required.

AVAILABLE FORMS AND SIZES

Standard Thicknesses
Single Layer – 1” thick up to 4” thick
Double Layer – Over 4” thick in ½” increments
Sizes available up to a 72” IPS but vary by thickness
Available in NPS pipe sizes and copper tubing sizes

Facings Available
Sizes ½” through 2” are supplied with no facing
Sizes 2.5” and above are supplied with a fiberglass mat facing
Other facings available include ASJ and FSK

*Tested in accordance with BS EN 13472 by testing via BS EN 1609 on the board used for fabrication
Technical specifications as shown in this literature are intended to be used as general guidelines only. Please refer to the Safety Data Sheet and product label prior to using this product. The physical and chemical properties of the MinWool-1200® Mitered Fittings listed herein represent typical, average values obtained in accordance with accepted test methods and are subject to normal manufacturing variations. They are supplied as a technical service and are subject to change without notice. Any references to numerical flame spread or smoke developed ratings are not intended to reflect hazards presented by these or any other materials under actual fire conditions. Check with the Regional Sales Office nearest you for current information.
