DESCRIPTION
Micro-Lok HP fiberglass pipe insulation is a high-performance insulation made from rotary glass fibers bonded with a thermosetting resin and produced in 36" (0.92 m) lengths. Micro-Lok HP insulation is used to insulate standard iron pipe, plastic pipe and copper tubing. The 3' (0.92 m) sections are available plain or with a factory-applied vapor-barrier jacket. The all-service (ASJ) vapor-retarder jacket includes a longitudinal, self-sealing closure lap. The jacket system is adhered to each fiberglass section using a specially formulated adhesive to ensure jacket securement.

The factory-installed tape system permits installation at ambient temperatures down to 20°F (-7°C) and will not soften or separate when exposed to high ambient temperatures and humidity.

USES
Micro-Lok HP fiberglass pipe insulation is suitable for installation over hot, cold, concealed and exposed piping systems with operating temperatures up to 850°F (454°C). Weather-protective jacketing is required for outdoor applications. Pipes operating below ambient temperatures require all joints to be sealed with the factory-applied, self-seal lap and butt strips.

PHYSICAL PROPERTIES
Service Temp. Range (ASTM C411) 0°F to 850°F (-18°C to 454°C)
Moisture Sorption <5% by weight
Alkalinity <0.6% expressed as Na2O
Corrosivity (ASTM C665) Does not accelerate
Shrinkage (ASTM C356) None
Microbial Growth (ASTM C1338) Does not promote microbial growth
Surface Burning Composite FHC 25/50 per ASTM E84, NFPA 255, CAN/ULC S102.2
Limited Combustibility NFPA 90A and 90B
Jacketing ASTM C1136 (Type I)
Water Vapor Permeance 0.02 perms max.
Burst Strength (ASTM D774) 55 lbs/in² (4.6 Kg/cm²)
Tensile Strength (ASTM D828) 45 lbs/in. (7.9N/mm) width min. (MD), 20 lbs/in. (5.23N/mm) width min. (CD)

SPECIFICATION COMPLIANCE
• ASTM C547 Type I (Replaces HH-I-558B, Form D, Type III, Class 12, Class 13 up to 850°F [454°C])
• ASTM C585 – Dimension Standard
• ASTM C1136 (Jacketing) (Replaces HH-B-100B, Type I & II)
• MIL-DTL-32585
• MIL-I-22344D, MIL-PRF-22344E
• Coast Guard/IMO Approved 164.109/56/0 (plain, unjacketed only – excluding 3/4 x 1/2 [22 mm x 13 mm], 1/2 x 1/2 [13 mm x 13 mm])
• California Bureau of Home Furnishings and Thermal Insulation – Registry Number CA-T040 (CO)
• Firestop Assemblies: Meets requirement for jacketed fiberglass pipe insulation product density at or above 3.5 pcf.
• ASTM E84, CAN ULC S102.2 – 25/50 listed and labeled Intertek testing laboratories
• NRC 1.36, ASTM C795, MIL-I-24244C, MIL-DTL-24244D*

*When ordering material to comply with these specifications a statement of that fact must appear on the purchase order. Specific lot testing will be conducted and a certification of compliance can be provided.

Operating Temperature Limits: 0°F to 850°F (-18°C to 454°C)

THERMAL CONDUCTIVITY ("K") *

SUSTAINABLE BUILDING ATTRIBUTES
Manufacturing Location Defiance, Ohio (43512)
Recycled Content (glass only) 41%
Recycled Content (total product) 32%
Volatile Organic Compounds Total 0.15 g/l
(Analysis ASTM D6196 & ASTM D5197)
Fiberglass Pipe Insulation Formaldehyde 0.008 ppm
Aldehydes 0.006 ppm
Volatile Organic Compounds (Calculated) Total <49 g/l
Self-Sealing Lap & Butt Strips Certified

SUSTAINABLE BUILDING CERTIFICATIONS
GREENGUARD® Certified products have been screened for more than 10,000 volatile organic compounds (VOCs) and meet stringent standards for low chemical emissions based on established criteria from key public health agencies

GREENGUARD® GOLD Certified
GREENGUARD® NC Certified

### QUALIFICATIONS FOR USE
A sufficient thickness of insulation must be used to keep the maximum surface temperature of Micro-Lok HP insulation below 150°F (66°C). In addition, at operating temperatures above 50°F (20°C), Micro-Lok HP pipe insulation must be applied in a thickness ranging from 2” (51 mm) minimum to 6” (152 mm) maximum.

During initial heat-up to operating temperatures above 350°F (177°C), an acid odor and some smoke may be given off as the organic binders used in the fiberglass pipe insulation begin to decompose. When this occurs, caution should be exercised to ventilate the area well. This loss of binder does not directly affect the thermal performance of the pipe insulation, but the compressive strength and resiliency of the product are reduced. For applications with excessive physical abuse or vibration at high temperatures, consult your local Insulation Systems Market Development Manager for alternate material recommendations.

### CHILLED WATER SYSTEMS
For chilled water systems, see Chilled Water InsulSpec™ – 3-Part Specification, MECH-239.

- "19” IPS not available in this insulation thickness.
- 3½” CTS not available in this insulation thickness.

### APPLICATION RECOMMENDATIONS*

**MICRO-LOK HP PIPE INSULATION AND BUTT STRIPS**

1. Do not apply Micro-Lok HP insulation if air temperature is below 20°F (-7°C) or above 130°F (54°C) due to the effect of temperature on tape performance. We recommend stapling when application falls outside this temperature range.

When stapling, we recommend mastic be applied over staples to prevent moisture penetration.

2. If stored below 20°F (-7°C) or above 130°F (54°C), insulation cartons should stand within the recommended temperature range for 24 hours prior to application.

3. Once release paper is removed, both adhesive and lap must be kept free of dirt and water, and the lap sealed immediately.

4. When adhered, the lap and butt strips must be pressurized by rubbing firmly with a plastic squeegee or the back of a knife blade to ensure positive closure.

*For complete application recommendations and installation instructions, see MECH-261 InsulSpec Specifications.
