DESCRIPTION
Zeston® Hi-Lo Temp fiberglass insulation inserts are flexible, pre-cut inserts for PVC pipe fittings. They are sized for each specific PVC fitting and are a lower-cost alternative to preformed or fabricated insulated elbows. The inserts are designed to meet the thermal requirements of ASTM C547 and ASHRAE 90.1.

Zeston Hi-Lo Temp Insulation Inserts are manufactured from rotary-process fiberglass bonded with a Formaldehyde-free™ resin. They are cut to size to be used in conjunction with JM’s Zeston PVC fittings. Zeston Hi-lo Temp Insulation Inserts are flexible, odorless, and vibration resistant. They can save time and labor during installation and are designed to meet corresponding pipe insulation thermal value. The Zeston Hi-Lo Temp Insulation Inserts are made with a formaldehyde-free binder; however, all bonded fibrous insulation products made with formaldehyde-free binders will result in some formaldehyde emissions at temperatures that exceed 450°F.

USES
Zeston Hi-Lo Temp Insulation Inserts are used to insulate PVC fittings in operating temps between 0°F-850°F/-18°C-454°C. JM recommends installing one (1) Zeston Hi-Lo Temp Insulation Insert for every 1” of corresponding pipe insulation thickness. The insulation insert may emit minimal smoke and odor during the initial exposure to elevated temperatures. Keep the area well-ventilated during the initial heat-up.

PHYSICAL PROPERTIES
• 2” thick 1.0 PCF density
• Formaldehyde-free™ acrylic binder
• Insulation is a white, light-weight, highly resilient, blanket-type thermal insulation manufactured from rotary process fiber glass
• Inserts are tabbed on sizes 2-10 and cut all the way through for large-size fitting inserts, to accommodate easy separation and resist tearing
• Service Temp. Range (ASTM C411) 0°F - 850°F/-18°C - 454°C
• Alkalinity <0.6%
• Corrosivity (ASTM C665 & C1617) Pass
• Limited Cumbustibility <3500 BTU/lB
• Microbial Growth (ASTM C1338) Pass
• Moisture Sorption <5% by weight
• PH 7.5 - 12
• Surface Burning Characteristics (ASTM E84) ≤ 25/50 (flame/smoke)
• Uncompressed Insulation thickness/density 2” Thick/1 PCF Density
