**Recycle Content of Whisperstone® Wallboard – Unit 89 Defiance, Ohio
(Q2 2020 Update)**

Johns Manville continues to dedicate our resources to making products that are well-designed, well-tested, and environmentally responsible. Increasing the recycled content of our products remains a key objective for JM as we move forward, and we will work to continually add more recycled content to our fiber glass insulation products.

Whisperstone® Wallboard, produced only on Unit 89 in Defiance, OH, continues to have high recycled content levels. We are pleased to announce that over the 12 months ending June 30, 2020, JM used a weighted average of 56% post-consumer recycled glass¹ as a percent of glass weight in Defiance Unit 89 products, including Whisperstone® Wallboard.

Please contact me or your JM Channel Leader should you require any additional information.

Sincerely,

A handwritten signature in black ink that reads "Mike R. Cagle".

Mike Cagle
Market Leader
OEM Insulations

¹Post-consumer content is material generated by households or by commercial, industrial and institutional facilities in their role as end-users of the product which can no longer be used for the intended purpose. This includes returns from the distribution channel (Source: ISO 14021)
