

InsulGrip Adhesive

Apply water to activate the adhesive

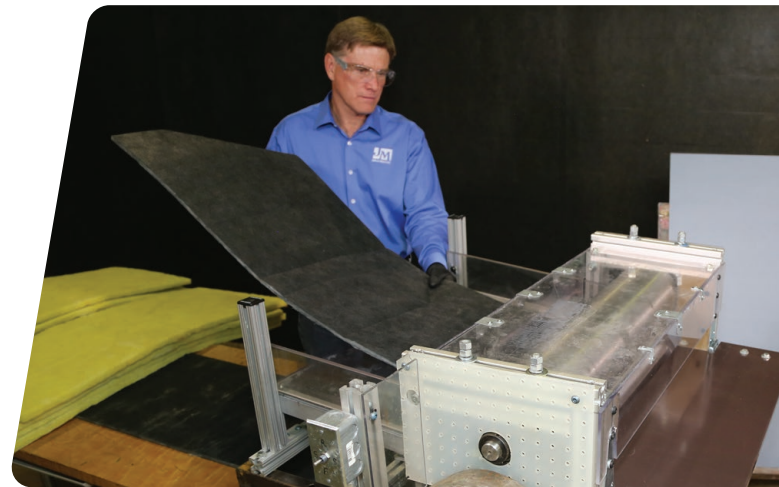

Install the insulation

## JOHNS MANVILLE'S INSULGRIP ADHESIVE

*Optimize your HVAC equipment insulation installation.*

InsulGrip® is a proprietary, water-based adhesive that is designed to **make fiberglass insulation easier for OEMs to install** in HVAC equipment. InsulGrip is applied to the insulation during fabrication, forming a dry layer. Installers then use water to activate the adhesive during the installation process. Once dry, InsulGrip will create a **strong, durable bond** that holds the insulation securely in place.

### APPLICATIONS

- HVAC Equipment
  - Fan coils
  - Furnaces
  - Air conditioners
  - Air handlers

### SPECIFICATIONS

- ASTM C916 Type I
- ASTM C1071 Type 1
- ASTM E84 Fire Hazard Classification class A

### FEATURES

- Strong, durable bond
- No VOCs
- Non-flammable
- Water-activated
