COMAPNY
Johns Manville, a Berkshire Hathaway company, was founded in 1858. Our ownership by Berkshire Hathaway, one of the most admired companies in the world and one of the most financially secure, allows JM to invest for the future. This enables JM to continue delivering the broadest range of insulation products in the industry and offering innovative solutions that meet your needs.

DESCRIPTION
GoBoard® is an ultra-lightweight yet durable, waterproof alternative to heavy sheathing products. Made of a high density, rigid polyisocyanurate core and coated glass fiber facer, it combines the weather barrier and sheathing functions, allowing completion of the building envelope faster and more cost effectively.

USE
GoBoard can be used in a wide variety of residential and commercial constructions. It is especially well-suited to offsite construction including modular and panelization.

APPROVED MATERIALS
• Fastening: Steel Stud – GoBoard combination washers for metal stud, 12” spacing field and perimeter.
• Joint Sealing: GoBoard® Pro Sealant.

INSTALLATION INSTRUCTIONS
• Position GoBoard against studs. Place washers and screw into center of washer until washer become seated firmly to board surface.
• Fasten GoBoard 6” at perimeter and 12” in the field. Position boards to leave an 1/8” gap between all boards. The handle of the GoBoard smoothing tool is marked for this purpose.
• Apply a generous bead of GoBoard sealant in the seam and a serpentine wave across the full seam between boards. Using a smoothing tool, smooth sealant so it covers the board 1” either side of the board seam. The GoBoard wet-film thickness tool may be used to ensure 15 mil thickness.
• Seal at field fastener penetrations by smoothing a dab of sealant at each location.
