Non-Traditional Adhesive Lid Combinations

Supply challenges continue to affect the roofing industry, and Johns Manville is no exception. Due to constraints in packaging manufacturing, JM is accepting non-traditional pail and lid combinations for the following adhesives:

70004667	JM TPO 1168 Membrane Adhesive 5 gallon
70004668	JM TPO/EPDM LVOC Membrane Adhesive 5 gallon
70005181	JM TPO/EPDM Membrane Bonding Adhesive 5 gallon

Please rely on label information and not pail/lid color when receiving into inventory or utilizing on a job. Please contact your Regional Sales Manager with any questions.

Thank you for allowing us to continue to be your supplier of choice.

Jennifer Ford-Smith
Director of Product Management
Johns Manville
